

TARIQ ALI

Full-Stack Software Engineer | React, Next.js, TypeScript, Node.js

Lahore, Pakistan | +92 310 4832079 | tariqali99.ta@gmail.com

tariqali.dev | linkedin.com/in/tariq-ali-116678156 | github.com/Tariqali13

PROFILE

Full-stack engineer with 8+ years building SaaS, ticketing, commerce, and client applications. Experience across React/Next.js interfaces, Node.js microservices, GraphQL, databases, AWS, and automated testing. Delivered payment and checkout features in production and led teams of up to 10 engineers.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Redux, Zustand, React Query, HTML/CSS, Tailwind CSS, Material UI

Backend and cloud: Node.js, Express, REST, GraphQL/Apollo, PostgreSQL, MySQL, MongoDB, Redis, AWS S3/Lambda/EC2/CloudFront, Docker

Quality and delivery: Jest, React Testing Library, Nightwatch/Selenium, GitHub Actions, GitLab CI, Prometheus, Grafana, accessibility, GA4, Stripe, PayPal

AI-assisted development: Hands-on experience with Codex and Claude

PROFESSIONAL EXPERIENCE

Software Engineer | Paciolan (via FullStack Labs), Order Team

Remote / United States | May 2022 - Sep 2026

- Built RSD Payment Schedules across cart, order, checkout, and confirmation, supporting installment payments for season-ticket donations; launched to seven Division-I athletic programs and executed the production feature-flag rollout.
- Shipped all-included ticket, donation, and fee pricing across event pages, seat maps, mini-cart, and zone modals. These features ran during onsales of approximately 3,000 tickets in 15 minutes with 4,000+ users queued and no reported issues.
- Migrated order confirmation from direct REST calls to GraphQL, authored fundraising resolvers, and delivered add-on purchasing with quantity validation, item comments, fee breakdowns, and confirmation-email handling.
- Fixed payment-path defects involving timezone-shifted installment dates, incorrect installment amounts, and donation allocation. Added Prometheus metrics and Grafana alerts, upgraded Node.js 20 to 24, and remediated an SSRF/input-injection vector.
- Delivered WCAG/ADA accessibility fixes and GA4 purchase-funnel analytics. Built Nightwatch/Selenium regression coverage integrated into deployment pipelines and maintained tests through third-party widget changes.
- Worked across 20+ repositories; extracted shared payment-schedule utilities, consolidated translations across four frontends, and coordinated production deployments and cross-team code reviews.

Frontend Engineer, Contract | Supercoder / Learning Crew

Remote / South Korea | Jan 2026 - Mar 2026

- Introduced React Query patterns, improved frontend architecture and API integration, and supported Swagger documentation and engineering handoff.

Frontend Developer, Contract | Supercoder / Hooaah

Remote / South Korea | Nov 2023 - Jul 2024

- Built reusable React modules, integrated backend functionality, and improved component organization for continued product development.

TARIQ ALI | EXPERIENCE CONTINUED

Full-Stack Engineer | Fiverr, Independent Client Work

Remote | Dec 2018 - Apr 2023

- Delivered client applications from discovery and architecture through deployment, CMS functionality, integrations, and support.
- Built photography booking and portfolio tools, employee/course/content management for HD Electric & Solar, and a CMS-driven real-estate platform for MoonsCreekProperties.

Full-Stack Engineer | ShopDev

Lahore, Pakistan | Oct 2021 - Apr 2022

- Led Shopdesk inventory and sales workflows, including product management, sales calculations, barcode support, and offline sales.
- Refactored modules and collaborated with the CTO and project manager on architecture; built React extensions integrated with Shopify for Amyris.

Senior Full-Stack Engineer | Renesis Tech

Lahore, Pakistan | Jul 2021 - Aug 2021

- Delivered Photobank in two months using React/Next.js, Node.js, and AWS. Implemented Rekognition face search across S3 galleries and Lambda-based thumbnails with photographer watermarks.
- Designed a reusable Stripe microservice for payment capabilities across company projects.

Senior Full-Stack Engineer / Team Lead | Innovation Insight

Lahore, Pakistan | Oct 2019 - Jul 2021

- Led major development and architecture of Vonza, an all-in-one SaaS for courses, stores, websites, memberships, funnels, and marketing.
- Led up to 10 engineers and worked with the CEO/CTO on subdomain routing, a website builder, payments, security middleware, and scalability.
- Built YayMaker real-time/chat workflows and Google Maps features; implemented payment logging, recovery workflows, and platform protection.

Senior Full-Stack Engineer | RSglowtech

Lahore, Pakistan | Dec 2020 - May 2021

- Led teams of 6-8 across healthcare appointment/patient tracking and an artist-share trading platform. Integrated third-party APIs and scheduled Node.js utilities, with regular client demos.

Full-Stack Engineer | Vvork Cloud Technologies

Lahore, Pakistan | Jan 2018 - Dec 2018

- Built student-management portal features, resolved complex defects, and collaborated with solution architects on technical requirements.

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Computer Science | NCBA&E, Lahore | 2022

Microsoft Exam 480: Programming in HTML5 with JavaScript and CSS3 | 2019

Additional training: Full-Stack Engineering (Mangtas); English Speaking (Emmersion)

LANGUAGES

English: Professional working proficiency
