PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 8+ years of experience building and modernizing SaaS, e-commerce, ticketing, fintech, healthcare, CMS, and AI-enabled products for international clients. Deep expertise in React, Next.js, TypeScript, Node.js, GraphQL/REST, SQL/NoSQL, AWS, and automated testing. Experienced in owning features end to end, designing reusable front-end and back-end architecture, working across microservices, and leading engineering teams of up to 10. Strong client-facing communicator with extensive remote collaboration experience across U.S. and international teams.

CORE EXPERTISE

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Zustand, React Query, HTML5, CSS3, Tailwind CSS, Material UI

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, Apollo, microservices, authentication, payment integrations

Data & Cloud: PostgreSQL, MySQL, MongoDB, Redis, AWS S3, Lambda, EC2, CloudFront, Docker

Quality & Delivery: Jest, React Testing Library, Enzyme, Nightwatch, CI/CD, GitHub Actions, GitLab CI, Agile delivery

Additional: Stripe, PayPal, Google Maps APIs, Zapier integrations, system design, code review, team leadership, client communication

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | FullStack Labs

Remote / United States | May 2022 - Present

- Contribute to Paciolan's large-scale event ticketing ecosystem, delivering production features across React/Next.js front ends, APIs, and distributed services used in complex event-management workflows.
- Build reusable, maintainable application patterns and collaborate with product, design, QA, and back-end teams to deliver new modules while preserving consistency across a microservices-based platform.
- Develop and maintain automated tests with Jest and related testing tools, improving regression coverage and confidence in production releases.
- Implemented AWS Lambda-based automation around repository and service workflows, reducing unnecessary system load and supporting more efficient operations.
- Work directly with U.S.-based stakeholders in a remote engineering environment, participating in technical discussions, estimation, code reviews, and iterative delivery.

Frontend Engineer - Contract | Supercoder / Learning Crew

Remote / South Korea | Jan 2026 - Mar 2026

- Contributed to a React-based product during a three-month contract, introducing React Query patterns, improving front-end architecture, and helping standardize API integration practices.
- Supported API documentation and engineering handoff through Swagger-oriented documentation and codebase cleanup, improving maintainability for the internal team.

Frontend Developer - Contract | Supercoder / Hooaah

Remote / South Korea | Nov 2023 - Jul 2024

- Built and enhanced reusable React front-end modules for the Hooaah platform, integrating back-end functionality and translating product/design requirements into maintainable user experiences.
- Improved component reuse and code organization to support continued feature development across the application.

Full-Stack Engineer | Fiverr - Independent Client Work

Remote | Dec 2018 - Apr 2023

- Delivered end-to-end web applications for international clients, covering discovery, architecture, development, deployment, CMS functionality, third-party integrations, and ongoing support.
- Built Alisa Schenk Photography with portfolio management, online booking, contact workflows, and blogging; delivered HD Electric & Solar with employee, hiring, course, and content-management capabilities.
- Developed a full CMS-driven real-estate platform for MoonsCreekProperties; maintained long-term client relationships through regular demos, status updates, and iterative delivery.

PROFESSIONAL EXPERIENCE - CONTINUED

Full-Stack Engineer | ShopDev

Lahore, Pakistan | Oct 2021 - Apr 2022

- Led development of Shopdesk inventory and sales workflows, including product management, complex sales calculations, barcode functionality, and an offline sales mechanism.
- Refactored existing modules to improve maintainability and performance, while collaborating closely with the CTO and project manager on product architecture and delivery.
- Built customized React extensions for Amyris and integrated them with Shopify-based applications.

Senior Full-Stack Engineer | Renesis Tech

Lahore, Pakistan | Jul 2021 - Aug 2021

- Delivered Photobank end to end in a two-month timeframe using React/Next.js, Node.js, AWS, and cloud-based image processing.
- Implemented AWS Rekognition-powered face search across S3-hosted image galleries and Lambda-based thumbnail generation with photographer-specific watermarking.
- Designed a reusable Stripe microservice to support payment capabilities across multiple company projects.

Senior Full-Stack Engineer / Team Lead | Innovation Insight

Lahore, Pakistan | Oct 2019 - Jul 2021

- Led major development of Vonza, an all-in-one SaaS platform for courses, stores, websites, memberships, funnels, and marketing; owned architecture and substantial portions of the production codebase.
- Led a team of up to 10 engineers and worked directly with the CEO/CTO on high-impact technical problems, including subdomain routing, a website builder, payments, security middleware, and platform scalability.
- Built core functionality for YayMaker, including real-time/chat workflows, Google Maps features, and supporting services; also contributed to an online fitness streaming product.
- Implemented payment logging, recovery-oriented workflows, reCAPTCHA, and security middleware to improve reliability and platform protection.

Senior Full-Stack Engineer | RSglowtech

Lahore, Pakistan | Dec 2020 - May 2021

- Led teams of 6-8 across multiple products, including a healthcare appointment/patient-tracking system and Baseline, a trading-style platform for artist shares.
- Integrated third-party music/data APIs, built scheduled Node.js processing utilities, and presented product progress directly to clients on a weekly basis.

Full-Stack Engineer | Vvork Cloud Technologies

Lahore, Pakistan | Jan 2018 - Dec 2018

- Developed a student-management portal and new platform features, resolved complex defects, and collaborated with solution architects to align technical architecture with business requirements.

SELECTED TECHNICAL PROJECTS

Paciolan - Enterprise event ticketing; React/Next.js, TypeScript, APIs, AWS, automated testing.

Vonza - Multi-tenant SaaS for courses, commerce, websites, funnels and memberships; architecture and team leadership.

Photobank / Face Search - AWS S3, Lambda and Rekognition-based image platform with automated thumbnails and face search.

Shopdesk - Inventory and point-of-sale workflows with offline sales and barcode support.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science | NCBA&E, Lahore, Pakistan | 2022

Microsoft Exam 480: Programming in HTML5 with JavaScript and CSS3 | 2019

Additional training: Full-Stack Engineering (Mangtas) | English Speaking (Emmersion)

LANGUAGES

English - Professional working proficiency
